

Press release by MPDV

MPDV positioned once more as a Challenger in the Gartner's Magic Quadrant for Manufacturing Execution Systems

MPDV unites innovation and consistency

Mosbach, March, 3rd, 2020 – MPDV, a leading provider of manufacturing IT, has been positioned in the Challengers quadrant of the 2019 Gartner Magic Quadrant for Manufacturing Execution Systems*.

The management comments

"We consider our positioning in the Challengers quadrant as a confirmation of our mission," said Nathalie Kletti, Vice President Enterprise Development and member of the MPDV management board. "We are continuously working on innovations, while at the same time we are further improving our well-established products. As part of the upcoming HANNOVER MESSE, we are again talking about innovations that we believe will change manufacturing IT considerably and further expand our market position."

Innovation vs. consistency

MPDV has always been both, a pioneer in the MES environment and a vocal advocate of usability. "In our opinion, innovation must serve the user and not just be an expression of innovative capability", explains Nathalie Kletti, "our customers appreciate this and reward us with their loyalty". More than 1,400 MES installations worldwide prove this strikingly. MPDV provides the well-established Manufacturing Execution System (MES) HYDRA and the open Manufacturing Integration Platform (MIP) and demonstrates that manufacturing IT does not always have to be tied to a single supplier. Nathalie Kletti adds: "We believe that being positioned in the Gartner Magic Quadrant for Manufacturing Execution Systems is proof for us being on the right track with our approach."

About MPDV

MPDV, headquartered in Mosbach/Germany, is the market leader for IT solutions in the manufacturing sector. With more than 40 years of project experience in the manufacturing environment, MPDV has extensive expertise and supports companies of all sizes on their way to the Smart Factory. Products such as MPDV's Manufacturing Execution System (MES) HYDRA or the Manufacturing Integration Platform (MIP) enable manufacturing companies to streamline their production processes and stay one step ahead of the competition. The systems can be used to collect and evaluate production-related data along the entire value chain in real time. If the production process is delayed, employees detect it immediately and can initiate targeted measures. More than 900,000 people in over 1,400 manufacturing companies worldwide use MPDV's innovative software solutions every day. This includes well-known companies from all sectors. The MPDV group employs around 500 people at 13 locations in China, Germany, Luxembourg, Malaysia, Singapore, Switzerland and the USA. Further information: www.mpdv.com.
