

Quality Management

HYDRA X
BUILD YOUR FACTORY SMART

WE CREATE SMART FACTORIES

Does **quality** in your production always get top grades? ... and do you know your parameters to optimize quality?

Motivation

"If we only **knew** what the problem is, **quality** could be much better and we could save substantial **costs**."

"We use **different systems** for our quality management. Keeping the systems up to date is **time-consuming** and **copying errors** are frequent."

"Is it possible to **increase** our employees' **awareness** of quality? If we could achieve this, it would make things a lot easier and better."

Your Issue

- Regard quality management in its entirety and turn it into a control loop.
- Plan quality inspections consequently.
- Rely on automatic reminders and make evaluations as required.
- Digitally integrate complaint processes and supplier evaluations.
- Identify failures before they occur.

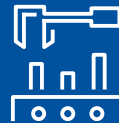

Our Solution

With the mApps of the HYDRA X category Quality Management, you can...

- ... plan inspections and document them in the control plan.
- ... integrate quality consistently – from goods receipt to dispatch.
- ... establish quality assurance during production.
- ... efficiently process internal and external complaints.
- ... run a continuous Failure Mode & Effects Analysis (FMEA).
- ... evaluate your suppliers based on actual data.
